VENADO
LEATHER CO.

LEATHER CARE GUIDE

HANDMADE IN
PLEASANTON, TEXAS

YOUR VENADO LEATHER GOODS ARE MADE TO BE USED. WITH PROPER CARE, YOUR LEATHER WILL DEVELOP A BEAUTIFUL PATINA AND LAST FOR YEARS.

01
CLEAN

Wipe away dirt and dust with a soft, dry cloth. For heavier dirt, use a slightly damp cloth and gently wipe the surface. Do not soak or saturate the leather.

02
CONDITION

Periodically apply a small amount of quality leather conditioner or mink oil with a clean cloth. Test any new product on an inconspicuous area first.

03
WATER & WEATHER

If your leather gets wet, wipe away excess moisture and let it air dry naturally. Never use a hair dryer, heater, or direct heat. Once dry, condition if the leather feels dry or stiff.

04
HEAT & STORAGE

Avoid prolonged exposure to extreme heat and direct sunlight. Store leather in a cool, dry place and make sure it is completely dry before storing. Avoid airtight plastic bags.

05
SYNTHETIC FLEECE LINERS

Shake out dirt and gently brush as needed. If wet, allow the fleece to air dry completely. Do not apply leather products to the fleece.

06
EMBRACE THE PATINA

Scratches, marks, color variation, and changes from use are natural characteristics of genuine leather.

Thank you for choosing Venado Leather Co.
